PROFESSIONAL SUMMARY

Automation Test Engineer with hands-on experience in Selenium WebDriver (Java, TestNG) and REST API automation (RestAssured, Postman). Completed a six-month Automation Testing internship building Page Object Model frameworks with data-driven testing, failure screenshots and ExtentReports. Skilled in STLC, defect reporting in JIRA and Agile/Scrum. B.Tech in Computer Science (CGPA 8.45).

TECHNICAL SKILLS

Test Automation: Selenium WebDriver, TestNG, Page Object Model, Data-Driven Testing, Maven, ExtentReports, Apache POI, Cucumber (BDD)

API Testing: RestAssured, Hamcrest, Postman (Chai assertions), REST APIs, CRUD Validation, Bearer Token Authentication

Programming: Java (Core Java, OOP, Collections, Multithreading), JDBC, JavaScript (ES6), Python (basics)

Manual Testing: Test Case Design, Regression, Smoke, Sanity, Functional, UAT, Exploratory Testing, Defect Life Cycle, SDLC, STLC

Databases: Oracle SQL, MySQL

Tools & Methodology: JIRA, Git, GitHub, Jenkins, Docker, AWS (EC2, ECS, EKS); Agile, Scrum

EXPERIENCE

Automation Testing Intern, High Catch Private Limited (in association with StarAgile) | Mar 2026 – Sep 2026

- Designed Page Object Model frameworks in Java with BaseTest, DriverFactory and ConfigReader utilities, driven by config.properties.
- Added explicit waits, automatic failure screenshots and timestamped ExtentReports through a TestNG listener.
- Implemented data-driven testing with TestNG Data Providers reading Excel via Apache POI.
- Automated 10 chained REST API tests with RestAssured and Hamcrest, plus a Postman collection with Chai assertions.

PROJECTS

BStackDemo E-Commerce: Selenium Automation Framework | Oct 2026 | GitHub

Java, Selenium WebDriver, TestNG, Maven, Page Object Model, ExtentReports

- Built a POM framework automating login, add-to-cart and checkout flows (7 test cases, positive and negative).
- Created BaseTest, DriverFactory and ConfigReader utilities; URL and browser are set in config.properties.
- Implemented a TestNG listener with ExtentReports for timestamped HTML reports; added screenshots and explicit waits.

BlazeDemo Flight Booking: End-to-End Automation Framework | Oct 2026 | GitHub

Java, Selenium WebDriver, TestNG, Maven, Apache POI, Page Object Model

- Automated the end-to-end booking flow (search, reserve, purchase, confirmation) with smoke and functional TestNG groups.
- Implemented data-driven testing with TestNG Data Providers, reading booking data from Excel using Apache POI.
- Built page classes, a base class and utilities (ExcelUtil, ScreenshotUtil); captured screenshots automatically on test failure.

Contact List Management: REST API Automation | Oct 2026 | GitHub

Java, RestAssured, TestNG, Hamcrest, Postman, ExtentReports, Maven

- Automated 10 API test cases (POST, GET, PUT, PATCH) covering registration to logout; validated status codes, status lines and response bodies.
- Chained bearer token and contact ID across tests; used timestamp-based emails so the suite re-runs without data conflicts.
- Wrote Postman test and pre-request scripts in JavaScript (Chai assertions, collection variables); generated ExtentReports HTML reports.

TRAINING & CERTIFICATIONS

- Automation Testing Internship Certificate, High Catch Private Limited with StarAgile (Sep 2026)
- Advanced Java Full Stack Training, Dreams Media Solutions (Sep 2024 – Mar 2025)
- NPTEL: Data Structures and Algorithms using Java (Silver Medal)

EDUCATION

B.Tech, Computer Science and Engineering, JNTU Kakinada | 2024 | CGPA 8.45 / 10

Class XII (MPC), Board of Intermediate Education, AP | 2020 | CGPA 9.5 / 10

Class X (SSC), Board of Secondary Education, AP | 2018 | CGPA 9.7 / 10

LEADERSHIP & VOLUNTEERING

- Club In-Charge, Technology Transfer Club: led a team of 15 to organize technical workshops and seminars.
- Volunteer, College Technical Fest: coordinated event operations for 500+ participants.
